1. Flowchart

2. Deskripsi Singkat Program

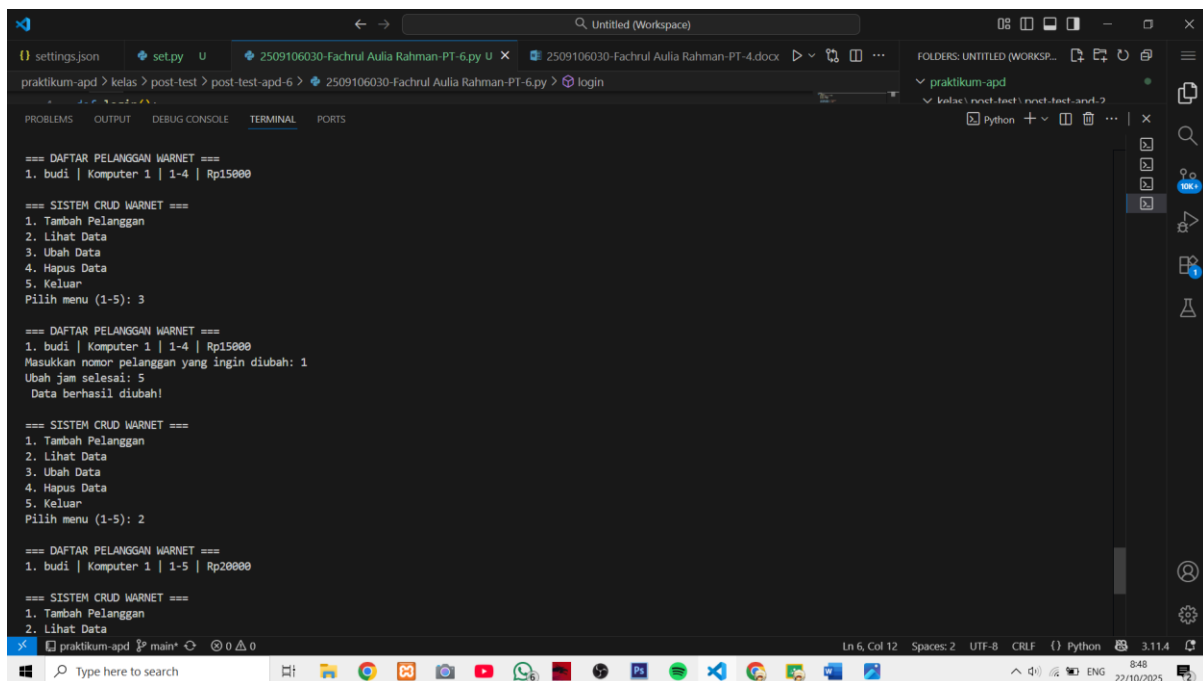

- Kegunaan dari program ini adalah CRUD data pelanggan di WarNet(Dictionary)

3. Source Code

```
4 def login():
5     print("\n" + "="*40)
6     print("LOGIN")
7     print("="*40)
8
9     username_benar = "Fachrul"
10    password_benar = "123"
11    percobaan = 0
12    max_percobaan = 3
13
14    while percobaan < max_percobaan:
15        username = input("Username: ")
16        password = input("Password: ")
17
18        if username == username_benar and password == password_benar:
19            print("\n Login berhasil! Selamat datang, Fachrul!")
20            print("="*40)
21            return True
22        else:
23            percobaan += 1
24            sisa = max_percobaan - percobaan
25
26            if sisa > 0:
27                print(f"Salah username atau password, coba lagi. Sisa percobaan: {sisa}")
28            else:
29                print("Maksimal percobaan tercapai. Akun telah terkunci.")
30
31    return False
```

4. Hasil Output

```
=== DAFTAR PELANGGAN WARNET ===
1. budi | Komputer 1 | 1-4 | Rp15000

=== SISTEM CRUD WARNET ===
1. Tambah Pelanggan
2. Lihat Data
3. Ubah Data
4. Hapus Data
5. Keluar
Pilih menu (1-5): 3

=== DAFTAR PELANGGAN WARNET ===
1. budi | Komputer 1 | 1-4 | Rp15000
Masukkan nomor pelanggan yang ingin diubah: 1
Ubah jam selesai: 5
Data berhasil diubah!

=== SISTEM CRUD WARNET ===
1. Tambah Pelanggan
2. Lihat Data
3. Ubah Data
4. Hapus Data
5. Keluar
Pilih menu (1-5): 2

=== DAFTAR PELANGGAN WARNET ===
1. budi | Komputer 1 | 1-5 | Rp20000

=== SISTEM CRUD WARNET ===
1. Tambah Pelanggan
2. Lihat Data
```

The image displays two sequential screenshots of a Visual Studio Code (VS Code) terminal window, showing the execution of a Python application. The application appears to be a simple CRUD (Create, Read, Update, Delete) system for a 'WARNET' (Internet Cafe).

Top Screenshot:

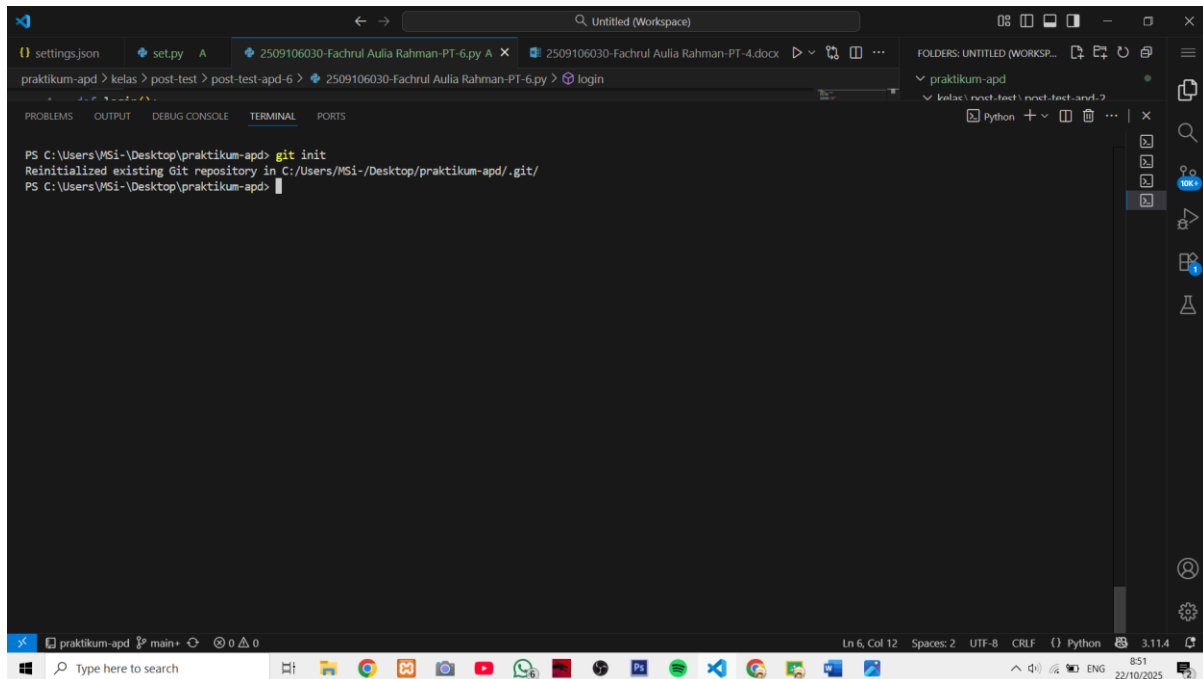

```
=====  
LOGIN  
=====  
Username: Fachrul  
Password: 123  
  
Login berhasil! Selamat datang, Fachrul!  
=====  
  
=== SISTEM CRUD WARNET ===  
1. Tambah Pelanggan  
2. Lihat Data  
3. Ubah Data  
4. Hapus Data  
5. Keluar  
Pilih menu (1-5): 1  
Nama pelanggan: budi  
Nomor komputer: 1  
Jam mulai (1-24): 1  
Jam selesai (1-24): 4  
Data budi ditambahkan! Total bayar: Rp15000  
  
=== SISTEM CRUD WARNET ===

```

5. Langkah-langkah GIT

5.1 GIT Init

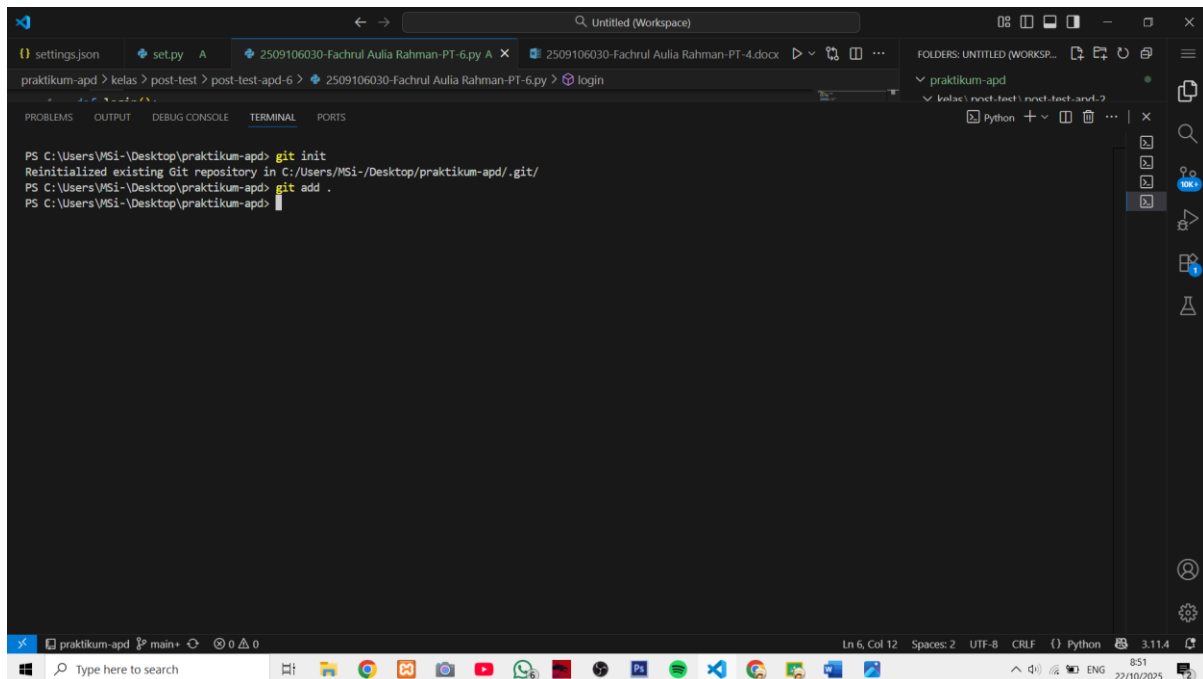

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the following commands and output:

```
PS C:\Users\MSI\Desktop\praktikum-apd> git init
Reinitialized existing Git repository in C:/Users/MSI-/Desktop/praktikum-apd/.git/
PS C:\Users\MSI\Desktop\praktikum-apd>
```

The terminal window is titled "TERMINAL" and is part of the "praktikum-apd" workspace. The file explorer on the right shows the folder structure of the workspace.

5.2 GIT Add

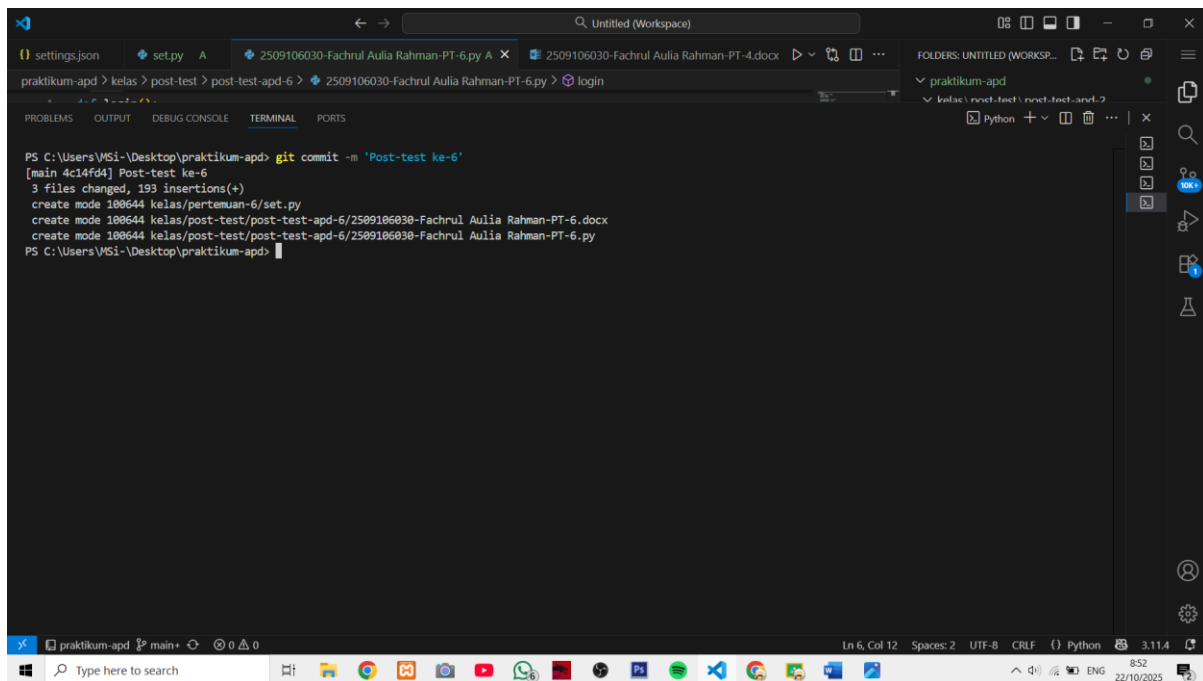

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the following commands and output:

```
PS C:\Users\MSI\Desktop\praktikum-apd> git init
Reinitialized existing Git repository in C:/Users/MSI-/Desktop/praktikum-apd/.git/
PS C:\Users\MSI\Desktop\praktikum-apd> git add .
PS C:\Users\MSI\Desktop\praktikum-apd>
```

The terminal window is titled "TERMINAL" and is part of the "praktikum-apd" workspace. The file explorer on the right shows the folder structure of the workspace.

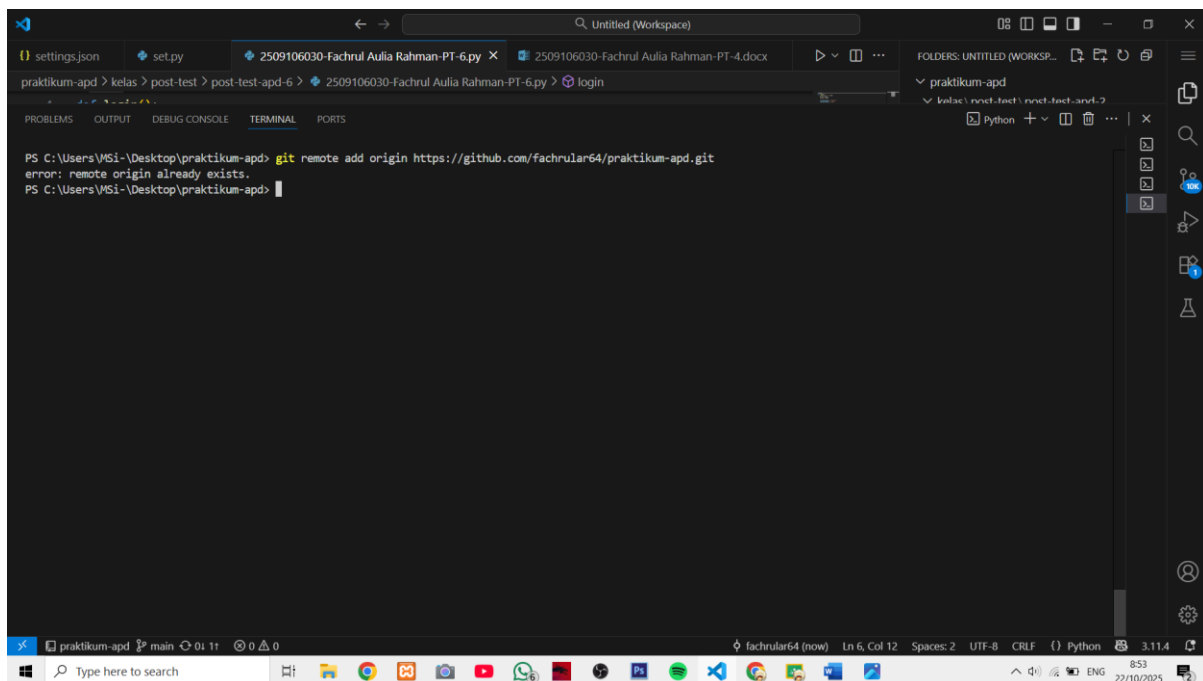

5.3 GIT Commit

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the output of a `git commit` command. The commit message is `'Post-test ke-6'`. The output indicates that 3 files were changed with 193 insertions. The files listed are `set.py`, `2509106030-Fachrul Aulia Rahman-PT-6.py`, and `2509106030-Fachrul Aulia Rahman-PT-4.docx`. The terminal prompt is `PS C:\Users\WSI\Desktop\praktikum-apd>`.

```
PS C:\Users\WSI\Desktop\praktikum-apd> git commit -m 'Post-test ke-6'
[main 4c14fd4] Post-test ke-6
3 files changed, 193 insertions(+)
create mode 100644 kelas/pertemuan-6/set.py
create mode 100644 kelas/post-test/post-test-apd-6/2509106030-Fachrul Aulia Rahman-PT-6.docx
create mode 100644 kelas/post-test/post-test-apd-6/2509106030-Fachrul Aulia Rahman-PT-6.py
PS C:\Users\WSI\Desktop\praktikum-apd>
```

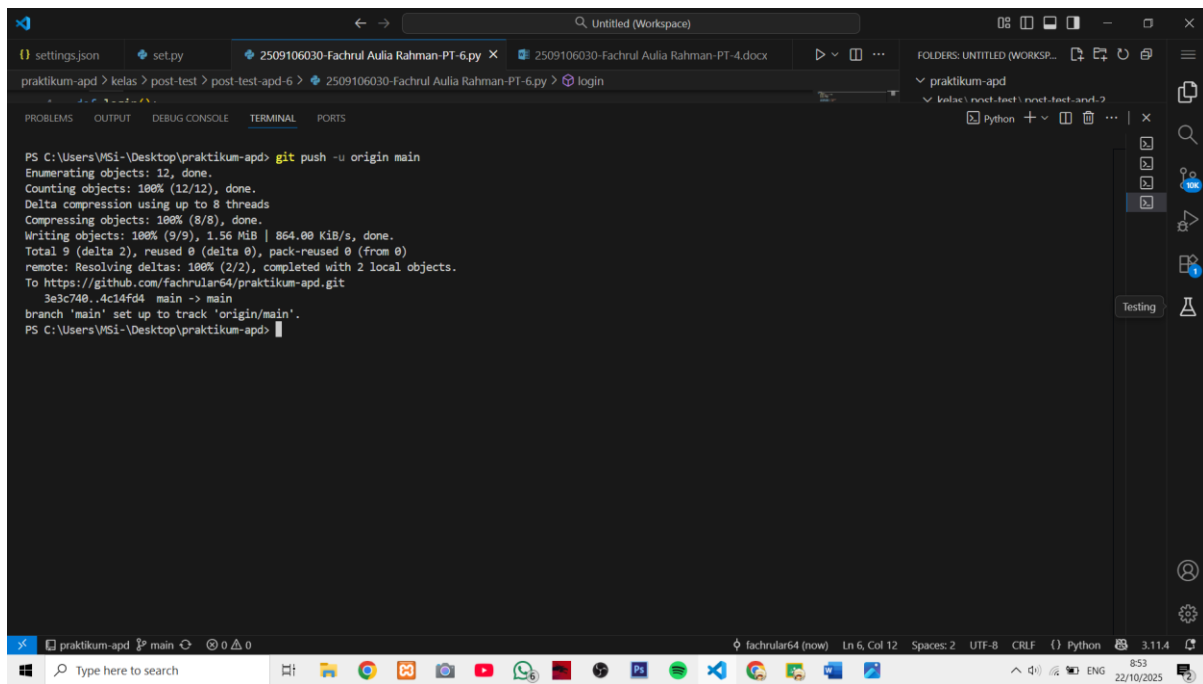

5.4 GIT Remote

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the output of a `git remote add` command. The command is `git remote add origin https://github.com/fachrular64/praktikum-apd.git`. The output shows an error: `error: remote origin already exists.` The terminal prompt is `PS C:\Users\WSI\Desktop\praktikum-apd>`.

```
PS C:\Users\WSI\Desktop\praktikum-apd> git remote add origin https://github.com/fachrular64/praktikum-apd.git
error: remote origin already exists.
PS C:\Users\WSI\Desktop\praktikum-apd>
```

5.5 GIT Push

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the output of a `git push` command. The command executed is `git push -u origin main`. The output shows that 12 objects were enumerated, 100% of the objects were counted, and 1.56 MiB of data was written to the remote repository. The remote repository is `https://github.com/fachrular64/praktikum-apd.git`. The branch `main` is set up to track `origin/main`.

```
PS C:\Users\MSI\Desktop\praktikum-apd> git push -u origin main
Enumerating objects: 12, done.
Counting objects: 100% (12/12), done.
Delta compression using up to 8 threads
Compressing objects: 100% (8/8), done.
Writing objects: 100% (9/9), 1.56 MiB | 864.00 KiB/s, done.
Total 9 (delta 2), reused 0 (delta 0), pack-reused 0 (from 0)
remote: Resolving deltas: 100% (2/2), completed with 2 local objects.
To https://github.com/fachrular64/praktikum-apd.git
 3e3c740..4c14fd4  main -> main
branch 'main' set up to track 'origin/main'.
PS C:\Users\MSI\Desktop\praktikum-apd>
