2025

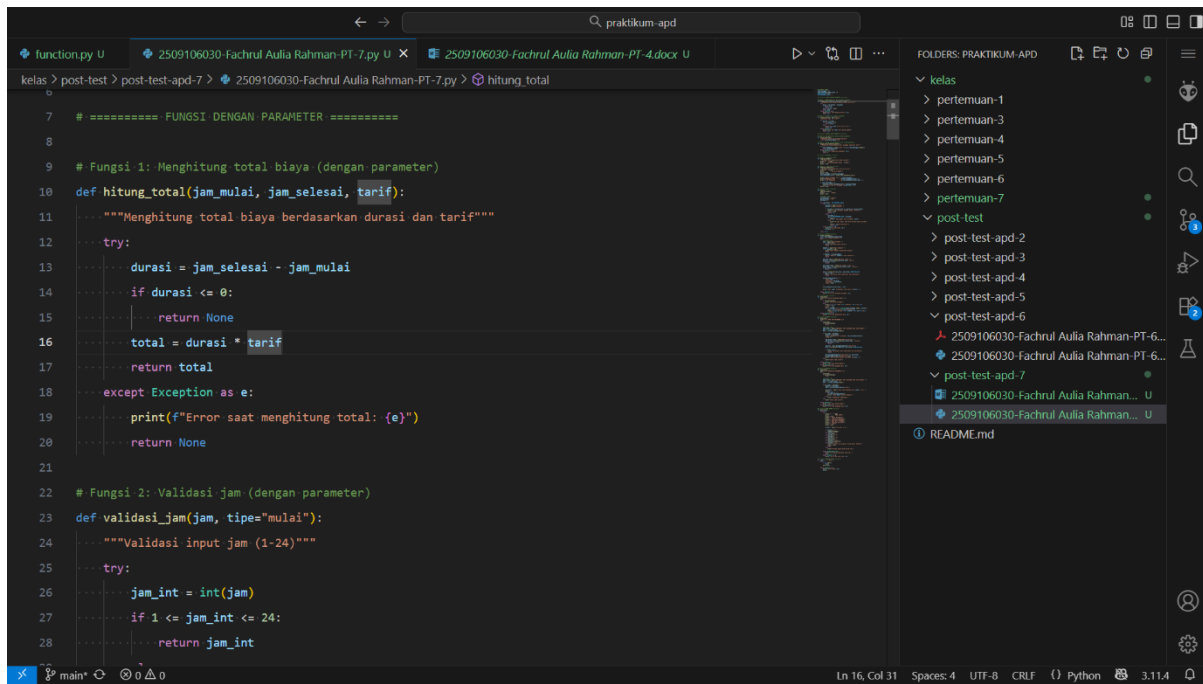

1.Flowchart

2. Deskripsi Singkat Program

- Kegunaan dari program ini adalah untuk CRUD data pelanggan di WarNet(Dictionary) dengan tambahan fungsi dengan parameter/tanpa parameter, prosedur, dan Error Handling.

3. Source Code

```
7 # ===== FUNGSI DENGAN PARAMETER =====
8
9 # Fungsi 1: Menghitung total biaya (dengan parameter)
10 def hitung_total(jam_mulai, jam_selesai, tarif):
11     """Menghitung total biaya berdasarkan durasi dan tarif"""
12     try:
13         durasi = jam_selesai - jam_mulai
14         if durasi <= 0:
15             return None
16         total = durasi * tarif
17         return total
18     except Exception as e:
19         print(f"Error saat menghitung total: {e}")
20         return None
21
22 # Fungsi 2: Validasi jam (dengan parameter)
23 def validasi_jam(jam, tipe="mulai"):
24     """Validasi input jam (1-24)"""
25     try:
26         jam_int = int(jam)
27         if 1 <= jam_int <= 24:
28             return jam_int
```

5. Langkah-langkah GIT

5.1 GIT Init

5.2 GIT Add

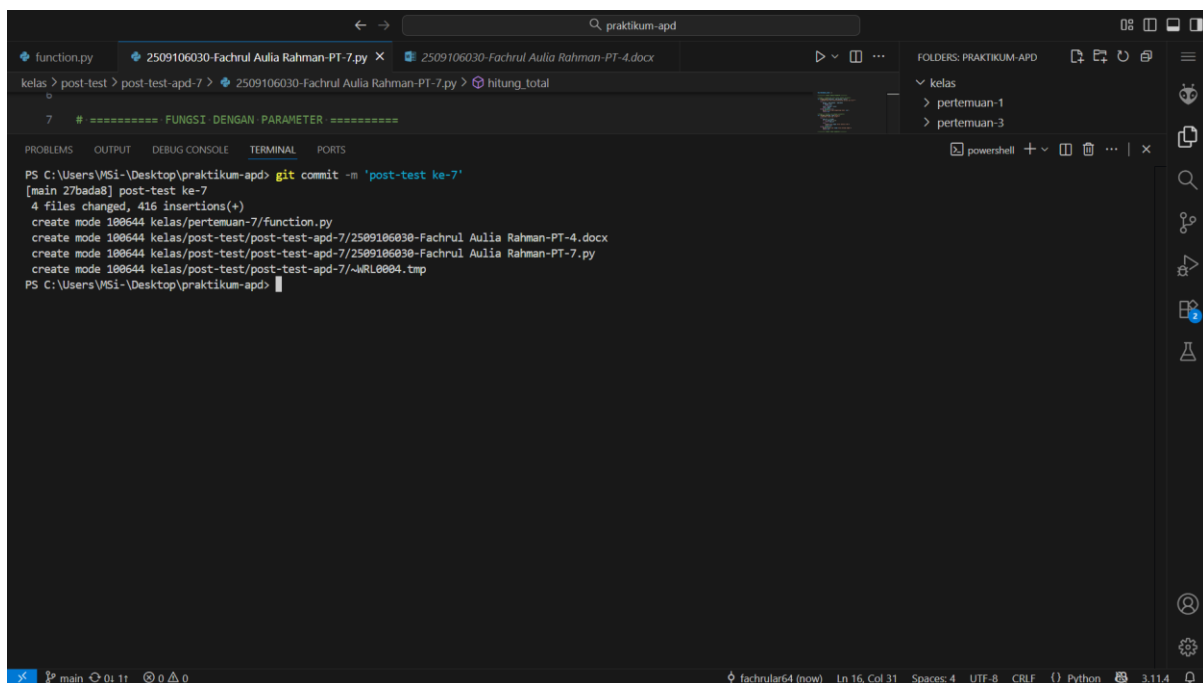

The screenshot shows the Visual Studio Code interface with a dark theme. The Explorer sidebar on the right shows a folder named 'praktikum-apd' containing a subfolder 'kelas' with files 'pertemuan-1' and 'pertemuan-3'. The Source Control sidebar is empty. The main editor area shows a file named 'function.py' with a single line of code: `# ===== FUNGSI DENGAN PARAMETER =====`. The integrated terminal at the bottom shows the following commands and output:

```
PS C:\Users\MSI\Desktop\praktikum-apd> git add .
PS C:\Users\MSI\Desktop\praktikum-apd>
```

The status bar at the bottom indicates the current file is 'main', the cursor is at line 16, column 31, and the encoding is UTF-8.

5.3 GIT Commit

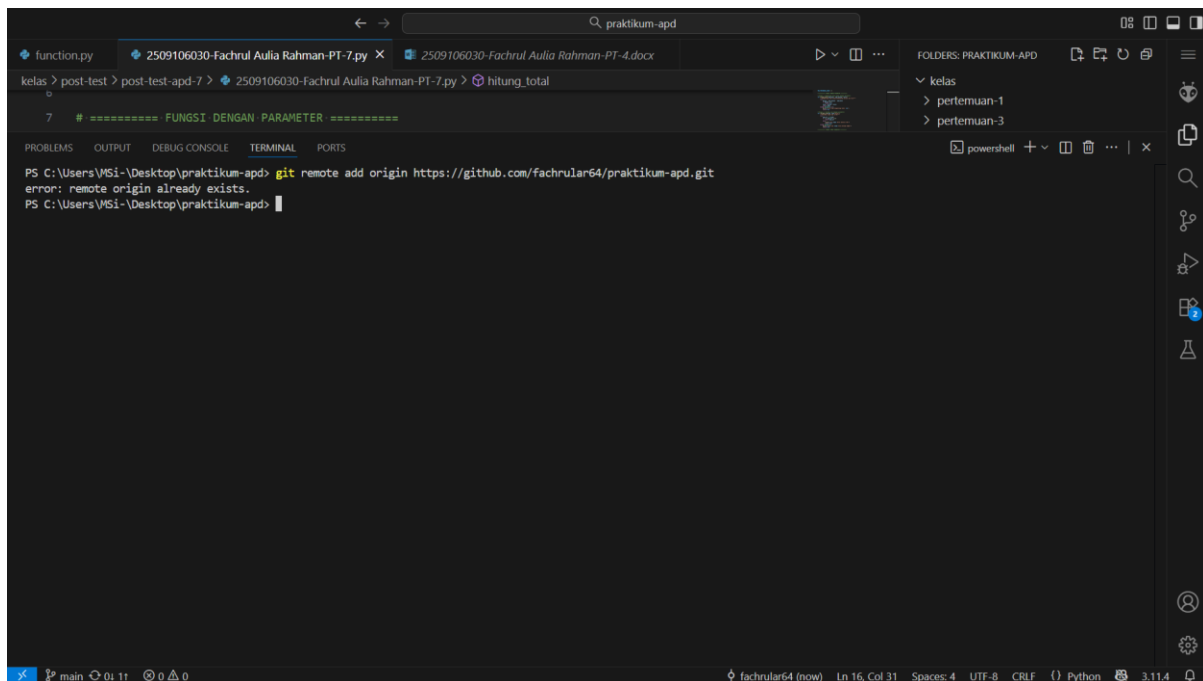

The screenshot shows the Visual Studio Code interface with the same setup as the previous image. The integrated terminal now shows the output of the 'git commit' command:

```
PS C:\Users\MSI\Desktop\praktikum-apd> git commit -m 'post-test ke-7'
[main 27bada8] post-test ke-7
4 files changed, 416 insertions(+)
create mode 100644 kelas/pertemuan-7/function.py
create mode 100644 kelas/post-test/post-test-apd-7/2509106030-Fachrul Aulia Rahman-PT-4.docx
create mode 100644 kelas/post-test/post-test-apd-7/2509106030-Fachrul Aulia Rahman-PT-7.py
create mode 100644 kelas/post-test/post-test-apd-7/~NRL0004.tmp
PS C:\Users\MSI\Desktop\praktikum-apd>
```

The status bar at the bottom now shows the commit hash '27bada8' and the branch 'main'.

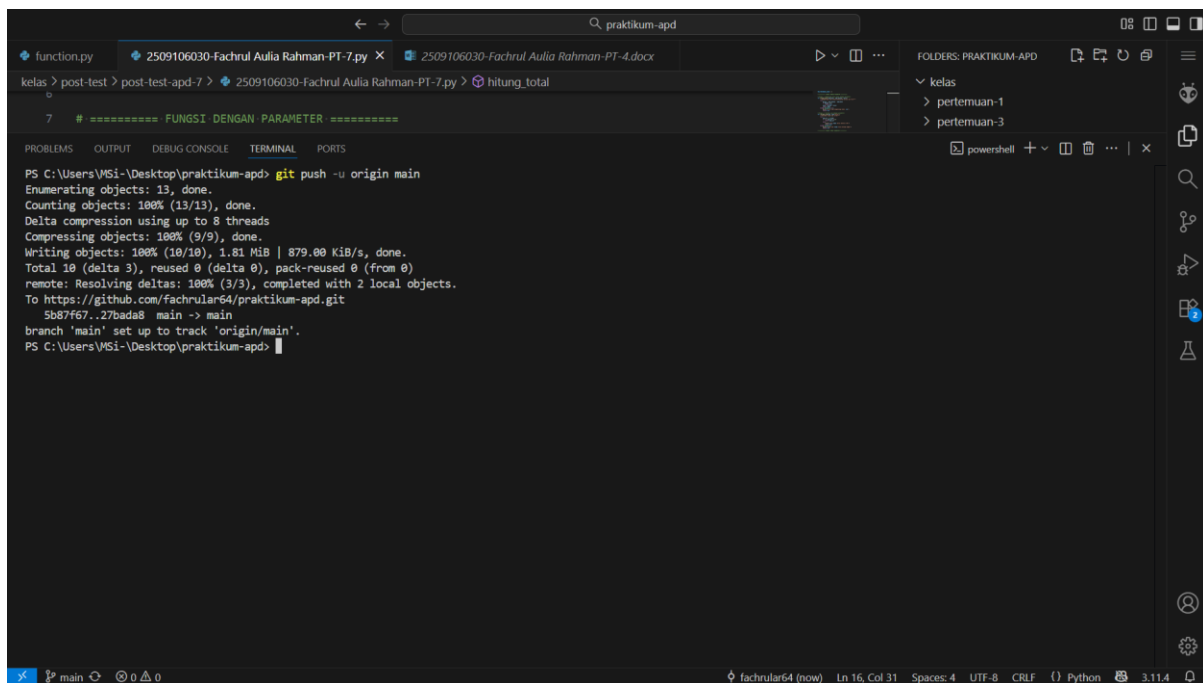

5.4 GIT Remote

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the command `git remote add origin https://github.com/fachrular64/praktikum-apd.git` and its output: `error: remote origin already exists.` The file explorer on the right shows the project structure with folders `kelas`, `pertemuan-1`, and `pertemuan-3`. The status bar at the bottom indicates the current file is `function.py` and the branch is `main`.

```
PS C:\Users\MSI\Desktop\praktikum-apd> git remote add origin https://github.com/fachrular64/praktikum-apd.git
error: remote origin already exists.
PS C:\Users\MSI\Desktop\praktikum-apd>
```

5.5 GIT Push

The screenshot shows the Visual Studio Code interface with a terminal window open. The terminal displays the command `git push -u origin main` and its output, which shows the progress of pushing the `main` branch to the remote repository. The output includes details about enumerating objects, counting objects, delta compression, and writing objects. The final output shows the branch `'main'` set up to track `'origin/main'`. The file explorer on the right shows the project structure with folders `kelas`, `pertemuan-1`, and `pertemuan-3`. The status bar at the bottom indicates the current file is `function.py` and the branch is `main`.

```
PS C:\Users\MSI\Desktop\praktikum-apd> git push -u origin main
Enumerating objects: 13, done.
Counting objects: 100% (13/13), done.
Delta compression using up to 8 threads
Compressing objects: 100% (9/9), done.
Writing objects: 100% (10/10), 1.81 MiB | 879.00 KiB/s, done.
Total 10 (delta 3), reused 0 (delta 0), pack-reused 0 (from 0)
remote: Resolving deltas: 100% (3/3), completed with 2 local objects.
To https://github.com/fachrular64/praktikum-apd.git
   5b87f67..27bada8  main -> main
branch 'main' set up to track 'origin/main'.
PS C:\Users\MSI\Desktop\praktikum-apd>
```
